Professional Summary

Resourceful Full-Stack Engineer and Technical Project Manager with 10+ years of proven success leading cloud-based, data-driven initiatives across healthcare, logistics, and eCommerce. Expert at bridging complex technical architectures (Angular, Node.js, C#/.NET, relational + NoSQL databases) with business strategy. Adept at stakeholder management, risk mitigation, and delivering scalable solutions on time and under budget. Self-taught, highly adaptable, and energized by fast-paced environments and collaborative problem-solving.

Core Competencies

- **Full-Stack Development:** Angular → AngularJS → React; Node.js; C#/.NET
 - **Cloud & DevOps:** AWS (EC2, Lambda, RDS); Azure; GCP, Firebase; CI/CD pipelines
 - **Data & Persistence:** SQL Server, PostgreSQL, MongoDB, Firestore, BigQuery
 - **Project Leadership:** Agile/Scrum; Jira; Stakeholder Alignment; Budget Oversight
 - **UX/UI Design:** Figma; Adobe XD; Responsive Design Best Practices
 - **Communication:** Client Workshops; Technical Documentation; Mentoring & Coaching
-

Professional Experience

Freelance Software Consultant & Project Manager

Self-Employed • Remote

May 2023 – Present

- Architected and delivered a Next.js/Node.js web portal for a boutique fitness studio, integrating Stripe payments, Google Calendar API, and Firebase Auth—boosting online bookings by 45%.
- Managed end-to-end cloud migration for a healthcare data analytics firm: designed AWS landing zone, ETL pipelines to BigQuery, and CI/CD workflows—reduced deployment times by 60%.
- Led cross-functional teams (4–8 engineers) on agile sprints, facilitated daily standups, sprint planning, and retrospectives—improved delivery predictability by 30%.
- Coached junior developers on clean code, test-driven development, and database schema design—resulting in 25% fewer production bugs.

Technical Project Manager / Full-Stack Engineer

ISS Value / ESO • Charlottesville, VA / Ontario, CA

May 2022 – Nov 2023

- Spearheaded design and implementation of a .NET Core/Angular dashboard for real-time tracking of EMR information; integrated RESTful APIs and SignalR for live updates.
- Defined data model and ETL process from SQL Server to MongoDB for high-volume telemetry ingestion; improved query performance by 70%.
- Coordinated stakeholder reviews and UAT sessions; documented requirements and produced release notes, ensuring 95% client satisfaction.
- Piloted a proof-of-concept using Docker containers on Azure Kubernetes Service—cut infrastructure costs by 40%.

UI/UX Developer & Database Administrator

Steele Consulting Inc. • El Paso, TX

Feb 2014 – Mar 2021

- Developed AngularJS single-page applications for patient data entry; enforced accessibility (WCAG 2.0) and responsiveness.
- Administered SQL Server databases (backup/restore, indexing, performance tuning); maintained 99.9% uptime.
- Collaborated with clinicians to iterate on wireframes and prototypes—accelerated feature adoption by 50%.

Education & Certifications

- Coursework in Computer Science & Business Administration (*Community College*)
- AWS Certified Solutions Architect – Associate (*in progress*)
- Certified ScrumMaster® (CSM)

Selected Projects

- **Gym Booking Platform:** Full-stack Next.js + Firebase site with Stripe & calendar integration.
- **BigQuery Data Warehouse:** Designed schemas, ingestion pipelines, and dashboard reports for university research.
- **Graph DB Analytics:** Neo4j/Cypher queries for UK Road Safety Data; extra-credit SQL comparison.

Technical Tools

Visual Studio • VS Code • Git/GitHub • Docker • Kubernetes • Jira • Confluence • Figma

Community & Mentoring

- Volunteer **Tech Mentor**, Local Coding Bootcamp
- **Bible Study Leader** & Church IT Support – Zion Fellowship
- Organizer, El Paso Full-Stack Meetup Group
